SONIA KEYS (1961-2018)

We are saddened to report that Sonia Keys died on 13 August 2018 at the age of 57, after a long struggle with cancer.

Sonia worked as a commercial software developer from 1983 to 2001 and then began working with the Astronomical Society of Kansas City, specializing in the tracking of Near-Earth Objects (NEOs). Her skill and reliability with NEO astrometry caught the attention of the Minor Planet Center (MPC), and that led to a position as an astronomer and software developer for the MPC.

As Kyle Smalley, she had served in the United States Navy's Nuclear Power Program, as an Electronics Technician and Reactor Operator aboard a submarine, and was honorably discharged in 1982. She then completed a bachelor of science degree in Mathematics and Computer Science at Central Missouri State University in 1986.

A few years after joining the MPC, Kyle made the profoundly brave decision to live, both personally and professionally, as Sonia Keys. This quiet but solid act exemplified the way she approached her work, with conviction and resolve.

Outside of the MPC, Sonia enjoyed programming (yes, she did it for fun!), photography and sailing on the Charles River. When weather or health conditions prevented her from sailing, she enjoyed watching televised yacht racing on the Internet.

Sonia was the conscience of the MPC. Her clarity of thought, her willingness to ask difficult questions, and her tenacity will be sorely missed.

EDITORIAL NOTICE

Contributors of perturbed orbital elements are advised that use of the epoch 2019 Apr. 27.0 TT (rather than 2018 Mar. 23.0 TT) will become effective *after* the publication of *this* batch of *Minor Planet Circulars*.

As part of the changes mentioned in the July 11 Editorial Notice, the Minor Planet Center is changing the way it announces new numberings of minor planets, without altering the criteria for numbering. This new method will be a great time saver for the MPC, and will enable numberings to occur more frequently, as well as allowing us to clear the backlog of numberings that were not possible previously because of the difficulty of determining who was the discoverer. Only NEAs and TNOs are being numbered in this batch.

NEW OBSERVATORY CODES

The following listing is a continuation to that on *MPC* 110131. The longitudes λ are measured in degrees eastward from Greenwich, and the parallax constants $\rho\cos\phi'$ and $\rho\sin\phi'$ are the product of the geocentric distance (in earth equatorial radii) and the cosine and sine, respectively, of the geocentric latitude.
