Schooner Governor Ames Ashore.

KEY WEST, May 30. — The five-masted schooner Governor Ames, Walterman, master, from Philadelphia for Galveston, loaded with coal, is ashore thirty-eight miles from Key West in eighteen feet of water. The tug Childs and schooners are assisting to save the cargo. The bottom on which the wreck lies is rocky and dangerous, but the weather is calm, and there is no danger, unless the sea becomes heavy.
